ADROL ELASTO 710

DESCRIPTION

ELASTO 710 is aromatic type of rubber process oil with good solvency. The oil is dark in colour and has good solvency. It is compatible with most rubber polymer.

APPLICATIONS

ADROL ELASTO 710 is suitable for use in manufacture of automobile rubber tyres, belting, battery case etc. Where colour is not an important parameter.

PERFORMANCE BENEFITS

- Adequate miscibility
- Excellent plasticizing properties

ADROL ELASTO 165, 245, 255

RUBBER PROCESS OIL

DESCRIPTION

Rubber process oils can be broadly classified into three basic groups depending on the physical arrangement of the carbon atoms namely, paraffinic, naphthenic and aromatics. All petroleum oils are mixtures of various hydrocarbon groups and their classification is arbitrary and is based on the predominance of a particular hydrocarbon group. ADROL ELASTO 165,245 and 255 are predominantly paraffinic rubber process oils suitable for use as plasticizers. ELASTO 165 and 255 are highly paraffinic.

APPLICATIONS

ADROL ELASTO 165 is suitable for use in EPDM RUBBERS. **ADROL ELASTO 245** is particularly suitable for use in butyl and ethylene propylene rubbers and light coloured rubbers. **ADROL ELASTO 255** is specially developed for shoe sole applications.

PERFORMANCE BENEFITS

• Adequate miscibility
